## ANKITST - EXCLUSIVE

# **3D Printer**

## Waxjet 400

### **Description**:

WaxJet 400 adopts multijet printing technology for printing smooth surface, high precision casting wax pattern. Large print size, and can be tiled and overlapped to place multiple models, the thickness of each layer is 0.016mm. It's suitable for jewelry, clocks instruments, crafts, precision casting and aerospace precision investment casting field.

#### WaxJet 400 Provides:

- 1. Customized and quick production of small batch orders;
- 2, Produce styles which traditional craft cannot achieve;
- Save the cost of plate making and revision, reduce reliance on manual revision;
- 4. Standardized process and save labor cost;
- 5. Anti-leak style, release designers creative.

#### **Material Specification**

Structural	Material

### FFWJ1100 N.W.:3.0 kg/bottle (2 mate

Supporting Material

N.W.:3.0 kg/bottle (2 material bins/ each device, auto reloading) FFMS3100 N.W.:3.6 kg/bottle (2 material bins/ each device, auto reloading)
