

Wax Injector

Waxmatic 45 Wax Injector

Description :

Automatic Operation:

- The Waxmatic is a fully automatic vacuum wax injector for precise molding.

Controlled by PLC:

- All parameters are managed by an industrial PLC with a user-friendly 7" TFT touch screen.

RFID Recipe Selection:

- Features an RFID reader for quick and easy selection of working recipes.

Air-Free Operation:

- Operates under vacuum, eliminating air and humidity to prevent air bubbles in wax injections.

Improved Mold Filling:

- The vacuum in the mold ensures efficient and complete wax filling, reducing waste.

Self-Centering Autoclamp:

- Equipped with a pneumatic autoclamp for uniform mold blocking, allowing quick creation of intricate designs.

Comprehensive Supply:

- Comes complete with a high vacuum pump, ready for operation.

Compressed Air Requirement:

- Requires compressed air at 6Bar (87 PSI)
