

Casting Machine

Yihu! Casting®

Mini Centrifugal Rotary Casting Machine

Description :

Centrifugal rotary machine can deliver an excellent effect on casting PT. Also for K gold and silver in small quantity. Use imported infrared detector for temperature and vacuum in melting process to prevent oxidation with argon or nitrogen inside. With vacuum pump inside the machine which can be adjusted by the pressure value. Induction heating coil adopts low voltage and high frequency design to ensure safety and improve casting efficiency. Intelligent operating system, simple and convenient operation, self diagnosis function,

Technical Specification :

Particular	Details
Model	Z.M.CM.RC150
Power Supply	220V / 50Hz
Power Output	4KW
Casting way	Vacuum Centrifugal Rotation
Cooling way	Water Cooling
Temp. Range	800 – 2000 °C
Vacuum Device	External
Flask Size	3.5" x 3"
Metal	PT, Gold, Silver
Weight	95Kg
Size	540 x 528 x 748 mm
