

3D Printer

3D PLUS

Wax Printer Ultra Rapid Series

Description :

-Cutting-edge Technology:

The Ultra Rapid series utilizes advanced continuous DLP-3D printing technology, significantly boosting printing speed, precision, and surface quality.

-Enhancements and Upgrades:

Through multiple technical improvements, this model, part of the 3D Plus lineup, has found widespread adoption in the jewelry industry.

-Mass Production Capabilities:

Its increased speed and precision make it a viable tool for mass production, particularly in jewelry manufacturing.

-Specialized Features:

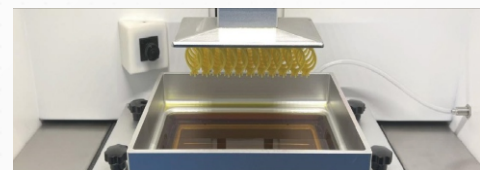

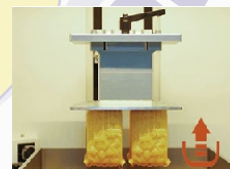

Equipped with an oxygen generator and an oxygen-permeable membrane, it accommodates high-content white wax resin. This makes it ideal for creating large, thick, and intricate parts that are challenging to cast traditionally.

-Batch Production:

The printer excels in producing parts in batches, meeting the demands of bulk manufacturing requirements.

-Exceptional Stability and Continuous Operation:

It boasts superior stability and the ability to work continuously, earning unanimous acclaim and satisfaction from customers.

Product Specification

Particular	Details
Model	4KL150UR
Brand	3D Plus
Technology	Ultra Rapid DLP
Formation Space	146x82x200mm
Pixel Precision	38um
Layer	10-50um
Printing Speed	15-50mm/h
Device Weight	156Kg
Device Size	62x620x143cm
