

3D Printer

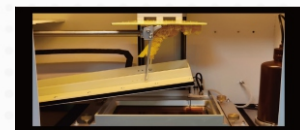

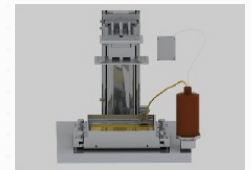

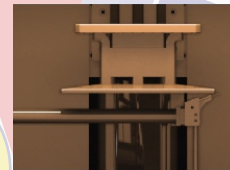

3D PLUS

Smart Wax Printer URC Series

Description :

- Ultra Rapid Continus Series:
Utilizes the latest ultra-fast continuous DLP-3D printing technology, significantly boosting printing speed by several times, achieving higher precision, and delivering smoother surface finishes.
- Enhanced Release Process:
Incorporates high oxygen-permeable release film and specialized release techniques, making the detachment process easier, smoother, and more successful, while ensuring simplified maintenance procedures.
- Automatic Pick-up Functionality:
Allows for automated pick-up of prints, enabling continuous operation without the need for constant supervision or intervention.
- Machine Vision Integration:
Utilizes machine vision technology to assess the success rate of printing, ensuring accurate judgment and enhancing the efficiency of the printing process.
- Remote Monitoring Capabilities:
Enables remote monitoring, guaranteeing foolproof printing by allowing oversight and intervention as needed, even from a distance.

This Ultra Rapid Continus series of printers revolutionizes the 3D printing process by leveraging cutting-edge technology to enhance speed, precision, and surface quality. Additionally, it introduces automation features and remote monitoring for a more efficient and reliable printing experience.

Product Specification

Particular	Details
Model	4KL200UR
Brand	3D Plus
Technology	UR DLP
Formation Space	200x112x3 00mm
Pixel Precision	52um
Layer	10-50um
Printing Speed	15-50mm/h
Device Weight	156Kg
Device Size	70x60x168 cm
