

De bubbling Unit

Description :

Robust Construction:

- Steel body designed for precision debubbling.
- Ensures effective vacuuming of investment powder and liquid rubber.

Versatile Vacuum Chamber:

- Large capacity chamber accommodates multiple flasks or RTV moulds simultaneously.

Reliable Performance:

- Equipped with a heavy-duty vacuum pump.
- Efficiently removes air bubbles from investment powder and liquid rubber.

Customization Options:

- In-house manufacturing capability for crafting equipment in any size and shape.
- Tailor-made solutions to meet specific requirements.

This equipment guarantees meticulous debubbling processes, reliable performance, and the flexibility to suit diverse needs through customizable design.

Technical Specification:

Particular	Details
Electrical Supply	230V AC, 1/2Hp Motor
Vacuum Pump	200 Ltrs
Ampere	6A
Vacuum Chamber	12" Dia me ter x 10 " Height
