

# Handwash

## SS Handwash

## PP Handwash

### Description

- **Portable Automatic Hand Wash Machine:** Designed to reclaim precious metals from workshop water, this portable machine ensures efficient recovery.
- **Internal Multi-Stage Filters:** Equipped with internal filters that facilitate maximum settlement of precious metal waste within the tank, optimizing recovery.
- **External Corrosion-Resistant Cartridge Filters:** External filters capable of controlling particles down to five microns in the wastewater, aiding in the recovery of precious metals.
- **Easy Precious Metal Recovery:** By replacing the filters, all precious metals captured within the filtration system can be easily retrieved.
- **Powerful Water Pump:** Features a robust water pump that efficiently transfers water from the tank to the drainage system.
- **Corrosion-Resistant Stainless Steel Sink:** The sink is crafted from durable, corrosion-resistant material, ensuring longevity and efficient use.
- **Customizable Hot and Cold Water Tap:** Provides the option, based on customer preference, to include hot and cold water taps as requested.
- **Indicator Gauge for Filter Replacement:** Incorporated indicator gauge on the machine aids in timely replacement of filters, maintaining optimal functionality and performance.

### Technical Specifications:-

Product Code	Model	Dimension (WxDxH)	Capacity	Power	Filter Capacity
AST1083	2 Tap	36" x 23" x 35"	15 TO 20 Walts	1/2Hp, 220 Volt	10 & 15 Micron
AST1084	3 Tap	48" x 23" x 35"	25 TO 30 Walts	1/2Hp, 220 Volt	10 & 15 Micron
AST1085	4 Tap	60" x 23" x 35"	35 TO 40 Walts	1/2Hp, 220 Volt	10 & 15 Micron
AST1086	5 Tap	72" x 23" x 35"	45 TO 50 Walts	1/2Hp, 220 Volt	10 & 15 Micron
