

# Melting Machine

## Rod Melter

### Description :

- Electric melting furnace designed with a solid steel construction body for the purpose of melting gold, silver, and other non-ferrous alloys for casting.
- Customizable in-house manufacturing allows for the creation of various sizes and shapes to meet specific requirements.

### Technical Specification:

Particulars	Details
Melting Capacity	1KG
Ampere	10A
Watt	3Kw
Voltage	220V
Time For Melting	10 min
