

Investment Powder

SRS Stonecast

Technical Parameters

Powder : **SRS Stone Cast**

Application: Specially Formulated for Wax Setting

SRS Stonecast is the industry leader for Wax setting investment. All that needs to be adjusted is the burnout cycle temperature which must not exceed 630°C. Today, SRS Stonecast is the industry leader for Wax setting investment powders. It works but ensuring that the correct De-oxidizing additives are present, thereby minimizing the risk of damage to diamonds or other precious stones.
