

Vacuum Pressure Casting Machine

Yihu! Casting®

Vacuum Pressure Casting Machine

Description :

- Use First-line brands core parts like SMC, Fuji, schneider and other to ensure equipment accuracy and reduce the failure rate.
- Reasonable design and equipped with a specific flask holder to make it easy for operating.
- Easy Operation, Touch Screen control. Two languages Chines & English Parameters of Vacuum, Pressure and time can be adjusted according to the casting.
- 1000 memory program to meet various production needs of the factory.
- Water and electricity isolation design reduce equipment failure.
- Machine size design accords with ergonomics.
- Suitable for flask with or without flange, lower conversion costs.
- Optional German vacuum pump and water cooling system.
- With CE certification.

Technical Specification :

Particular	Details
Model	Vacuum pressure casting machine
Power supply	3 Phase, 380V, 50 -60Hz
Power output	15Kw
Suitable metal	Gold, Silver, Copper
Melting Capacity	2.5Kg
Temp. range	K type thermocouple 1100 °C, R type thermocouple 1450 °C
Maximum pressure	0.2Mpa
Protection gas	Argon or Nitrogen
Types of cooling	Water cooling
Casting method	Vacuum pressure casting
Abnormal warning	Self-diagnostic LED display
Environmental temp.	5-40°C
Vacuum setting	100m ³ /External vacuum pump more than 100m ³ /H
Water supply	10-30°C and better use the water chiller more than 3p
Machine dimension	750x700x1220mm
Weight	200Kg
