

# Wax Injector

## IW Pro

### Description : *Yihu! Casting*

- The Controller and the wax injection case are separated for heat insulation, and fully fitting technology.
- One thousand program presets.
- RF shooting screen induction, lifting motor
- Temperature control accuracy +0.1C.
- 99% wax injection success rate, one - key exhaust and wax discharge function, digital barometer.
- Pressure value of wax chamber and vacuum is shown on touch screens.
- 1000 groups of programs are shown on touch screens.
- The parameters in programs are quickly called through radio frequency induction card.
- Small-size design for the machine covering smaller areas.

### Technical Specification:

Particular	Details
Model	Pro
Voltage	AC 220V ±10%, 50-60Hz Single phase
Power	500W
Fuse Specification	5A/250W
Heating Temp. Range of Wax Bath	0-95°C
Wax Nozzle Heating Temp. Range	0-95°C
Vacuum Timing Range	0-20S
Wax Injection Timing Range	0-20S
Wax Tank Capacity	3KG
Wax Tank Setting Pressure	<200KPa

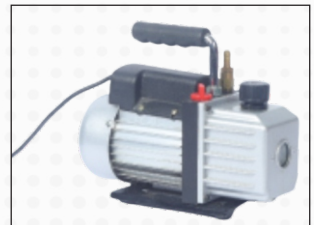

Wax Chamber Lid

Control Box

Movable Auto Clamp

Vacuum Pump
