

# Work Tables

**Gold Smith Working Bench**

## Description :

- The workstation is equipped with a dust extractor with double cyclonic filter, with immediate recovery, connected to a height-adjustable suction nozzle.
- The latter allows the use of a microscope (not included) without losing the benefits of the suction.
- The suction system is also composed of a flexible and removable nozzle to tilt the suction backwards with respect to the object being worked on, especially useful when using drills or rotating tools.
