

Lapping Machine

Lapping Machine

Description

Unit consist at 3/4Hp, 2800 RPM motor is mounted at a 45 angle with excellent visibility. when use with felt split laps. the operator can see through the lap to jeweler surface. the body is constructed as per vibration tree specification for smooth operates the powerful dust collector is suitable for the collection and extraction at all precious metal filtration system utilizes micro filter system in filter bags which results in greater energy saving and graded filtration efficiency.

Technical Specifications:-

Particular	Details
Model	Split Lapping Machine
Voltage	220v/440v
Power	1.25HP
Machine Dimension	W-653" x D-653" x H-1220"
